Controller

The liquid lens is controlled with electrical current and must be operated by a suitable lens controller. Hirose cables and liquid lens controllers are sold separately. The following controllers are considered fully compatible with ELM-8-5.6-11-C:

- Optotune lens driver EL-E-4i
- Optotune industrial controller ICC-4C-500

This lens module can also be controlled by Opto Engineering's ITALA G.EL camera series, which offers thermal compensation (Focal Power Mode).

Additional selection of controllers is available at
